

SIGMADESIGN expands to Seattle after significant growth

(November 1, 2018) – SIGMADESIGN, a product design and engineering services company with a global presence, has expanded into the Seattle region. To support the firm’s consistent growth, it will open a new office in Kirkland on November 15th, 2018. Over the past year, SIGMADESIGN extended its presence in Seattle working with several clients and is planning for continued advancements in new markets.

To support the launch of the Seattle office, SIGMADESIGN hired Lené Russell as Operations Manager and Craig Baerwaldt as Business Development Manager. Russell formerly served as Principal Operations Program Manager with the Amazon Go business in Amazon. Craig Baerwaldt, commenting on the Seattle area expansion, notes “SIGMADESIGN already has a strong presence in the UAV industry, so increasing development within the local aerospace market is a natural fit.” He adds, “In the product development market, confidentiality when developing and prototyping hardware is paramount. As companies such as Google, Facebook, Apple and Boeing continue to develop in Seattle, it makes sense for us to provide services that match the growth of major players in the region.”

SIGMADESIGN, which was founded in 1994 with just two employees, now has over 300 employees occupying over 74,000 square feet of office, manufacturing and test facilities worldwide. The new Seattle office in Kirkland, WA will be the fourth major physical space, in addition to the headquarters in Camas, WA, the manufacturing and engineering facility in Singapore, and the advanced prototyping center in Vancouver, WA.

“We have grown a lot in 24 years as a result of our number one asset, our people, along with a focus on strategic planning. Our expansion into Seattle supports part of our long-term vision which includes purposeful growth along on the West Coast,” says Bill Huseby, President and CEO of SIGMADESIGN. He adds, “We currently have a number job openings in Bellevue and Redmond to support our growth.”

The new Seattle area office is located in the Totem Lake Business Park in Kirkland, WA. A grand opening is scheduled for Thursday, November 15th, 2018. The new office provides the impetus for the firm’s growth as one part of a greater strategic plan to expand relationships in the Seattle area. Specifically, the firm is planning to grow connections in aerospace, healthcare, clean technology, information communication technology, maritime, military and defense industries.

The new office is located at:

SIGMADESIGN
12903 NE 126TH Place
STE B240
Kirkland, WA 98034

Phone Number: (425) 979-2010
