Twenty-five years of Product Development and Engineering Success

(June 7th - 2019) –This June marks a major milestone in the life of **SIGMADESIGN**. The company celebrates its 25th anniversary on June 27th, 2019 at its World Headquarter in Camas, WA. The company’s success is evident in the twenty-five years of designing and engineering products for companies and communities all over the world. Twenty-five years of hiring the best from the Pacific Northwest to Singapore. Twenty-five years of practicing integrity, adaptability and exceeding customer’s expectations. These fundamentals have kept **SIGMADESIGN** strong for a quarter of a century.

Plans for the next 25 years will continue to support the company’s progress and growth. The firm plans to elevate capabilities and efficiencies in order to benefit clients. As growth continues, we will maintain our emphasis on upholding the strong, family-like company culture and profit sharing with employees. The mission is clear: To be the best Product Development Services company in the world by offering solutions from Concept through Production for our clients.

SIGMADESIGN’s roots run deep in the local community. The company invests in providing a good work environment for employees and supports education and community programs (especially STEM-focused). President and CEO Bill Huseby would enjoy the opportunity to thank clients and others that have contributed to the firm’s 25-year history. “We’ve set some high goals and will have to work hard to meet them, but I have no doubt that we have the right people to get us there.” – *Bill Huseby, President & CEO*

ABOUT SIGMADESIGN, INC.

SIGMADESIGN is a product design and engineering firm headquartered in Camas, WA. The firm offers professional services that support projects from concept through production. **SIGMADESIGN** provides turnkey solutions for projects through solid engineering, broad experience, and focused execution.

The firm was founded in 1994 to serve the product design needs of the US Pacific Northwest. With our West Coast growth and an office in Singapore, we serve a world-wide client base. Our expertise and services are comprehensive and in-house. We enjoy the opportunity to assist at any stage of the product development process.

SIGMADESIGN offers a full range of services including Industrial Design, Systems, Mechanical, Electrical, Firmware and Software Engineering, Rapid Prototyping, Machine Shop Services and Part Fabrication, Product Testing, Manufacturing, Logistics and Shipping.
