SIGMADESIGN launches Pasadena location.

(May 18, 2020) – **SIGMADESIGN** expands to Pasadena, CA in order to assist a growing number of clients in the broader Los Angeles area. The new location will enhance services for a number of current clients in the area as well as strengthen opportunities in additional market sectors in defense, technology, and medical industries.

With more manufacturing coming back on-shore, **SIGMADESIGN** noted an opportunity requiring an increased need to provide manufacturing and product development solutions in the Pasadena area. This in part, along with the company’s strategic plans that include expanding along the west coast, prompted the opening of the new office location.

For more information about **SIGMADESIGN**’s Pasadena research lab and services offered, contact Joby Easton, VP of Business Development at 360-693-2600.
