

Lindsey Dotson

PRESIDENT & CEO

As the President and CEO at **SIGMADESIGN**, I'm committed to leading the company with "no regrets."

My expertise includes directing cross-discipline engineering teams for better performance across the spectrum of systems, mechanical, firmware, software, and electrical engineering services. In collaboration with the executive team, I aim to improve efficiencies and provide leadership to ensure we deliver the right solution(s) for our clients. I also help drive strategic initiatives that continually improve company performance.

My background includes a B.S. in Computer Engineering and various positions directing engineering teams and corporate functions teams. This varied experience has heightened my problem solving and communication skills, and I enjoy the range of challenges which intersect engineering and business.

Applying my 21 years of experience and expertise in Firmware and Software engineering, I am able to apply my problem solving skills to leadership and business problems to uncover the best path forward. Also, my technical abilities help me lead teams to deliver well-developed, high-performing, and tested client projects as well as business functions.

My ability to focus on the big picture and influence stakeholders, leadership, and employees allows me to successfully lead this company, improve our work efficiency, and advance long-term financial goals. As the President and CEO, I have the privilege of leading and working with talented teams to bring company initiatives to life.
